Better light
Finer decoration
for home and office

Deskmaster
by LIGHTOLIER

DESKMASTERS by Lightolier — they're designed to shed *more* light, *where* you want it. The cantilevered, die-cast arms bring the light forward, while leaving the work area clear. The engineered shades "warm" the fluorescent light and direct it away from your eyes onto your papers. And note their decorative importance . . . their smart simplicity . . . their good looks and coordinated colors that blend harmoniously with your furnishings —contemporary or traditional—office or home.

Certainly, "It's a Lightolier"!
